	Examiner Alexa D. Neckel	Art Unit 1764	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 10, 2006 has been entered.

Drawings

2. The drawings were received on April 10, 2006. These drawings are acceptable.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 24-26 and 28-30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 30 continues to contain the

Art Unit: 1764

limitations added in amendment filed August 29, 2005 which were rejected in the Final Office Action of December 8, 2005. Additionally, the most recent newly added limitations in claim 30 are not disclosed in the originally filed specification.

Claim Rejections - 35 USC § 103

5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
6. Claims 24-26 and 28-30 continue to be rejected under 35 U.S.C. 103(a) as being unpatentable over Kruger (EP 0 992 659 A2) in view of "3M Interam Mat Product Guide", either Santiago et al. (4,155,980) or Abthoff et al. (4,145,394), and Smith et al. (5,720,319) as presented in the Final Office Action of December 8, 2005.

Response to Arguments

Drawings

The objection to the drawings is withdrawn due to Applicant's newly submitted drawings.

35 USC 112, First Paragraph

Despite Applicant's statement that they did "delete the offending language" of claim 30, most of the newly recited limitations remain in the claim and Applicant has not indicated where support for these limitations can be found in the originally filed specification. These limitations include: a manifold wall "including a thickened section defining an outlet port" and "at least one recess formed in said wall...".

Art Unit: 1764

35 USC 103

Applicant's arguments fail to comply with 37 CFR 1.111(b) because they amount to a general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references.

With regard to the newly added limitations directed to the casting of the device, not only was this subject matter not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention (the only mention of a single casting is with regard to the prior art in paragraph 0009), but also the method of forming a device is not germane to the issue of patentability of the device itself.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexa D. Neckel whose telephone number is 571-272-1446. The examiner can normally be reached on Monday - Thursday from 9:00 AM - 7:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on 571-272-1444. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
